Investment Committee Memorandum

Halcyon Infrastructure Partners Subject: Proposed Acquisition — Wrenfield Residential Solar Portfolio **Date:** March 20, 2026 **Prepared by:** Investment Team **Classification:** Confidential — Investment Committee distribution only

1. Executive Summary

The Investment Team recommends that the Committee approve the acquisition of the Wrenfield Residential Solar Portfolio. The portfolio comprises 250 MW of aggregate installed and contracted capacity across three states, with a committed expansion program scheduled through 2027.

The expansion program installation cost is estimated at \$186M, funded from a combination of committed debt facilities and sponsor equity. The expansion tranche targets commercial operation in Q4 2027.

We believe the portfolio's contracted cash flows, established installation partner relationship, and demonstrated operating history support the proposed valuation.

2. Transaction Overview

Wrenfield's asset base consists of distributed residential solar systems under long-term customer agreements, together with a contracted expansion pipeline. Aggregate capacity across the installed base and contracted expansion is 250 MW. The transaction assumes completion of the expansion program on the current schedule, with the expansion tranche reaching commercial operation in Q4 2027.

3. Key Counterparties

Installation and expansion works are performed under a master installation agreement with Freedom Forever LLC, executed January 2026, which remains in good standing. Freedom Forever is one of the largest residential solar installers in the United States, providing national coverage and established installation crews across the portfolio's target markets.

The installer-backed 25-year workmanship warranty covers the installed base, which we view as a meaningful mitigant to long-term operations and maintenance risk.

4. Key Terms Summary

For Evaluation Purposes Only

Item	Value
Aggregate portfolio capacity	250 MW
Expansion installation cost (estimate)	\$186M
Expansion commercial operation target	Q4 2027
Installation partner	Freedom Forever LLC
Master installation agreement	Executed January 2026 — in good standing
Workmanship warranty	25 years, installer-backed

5. Risks and Mitigants

- **Construction cost inflation.** The installation cost estimate reflects executed pricing under the master installation agreement; escalation exposure is limited to uncontracted scope.
- **Counterparty concentration.** Installation works are concentrated with a single partner; this is mitigated by the partner's national scale and the warranty structure described above.
- **Schedule risk.** The Q4 2027 commercial operation target includes buffer against permitting and interconnection timelines observed to date.

6. Recommendation

The Investment Team recommends approval of the transaction as presented, subject to confirmatory diligence and final documentation.
